# Hello, Nebulon! (Galaxy Zack Book 1)

## Synopsis

Get to know Galaxy Zack™ and his new home planet!™ in this start to an out-of-this-world illustrated chapter book series. In Hello, Nebulon!, Zack makes the big move from Earth. He is already nervous about starting school and making new friends, but it only gets worse when he dreams that his classmates are slimy aliens with tentacles, pizza comes covered in gross bugs, and he can never communicate with his Earth friends again! Fortunately, when Zack arrives at Sprockets Academy for his first day of school, he meets and befriends Drake Tucker, a Nebulite boy who also loves to explore and learn about the planets. Nebulon isn't as awful as Zack's dream, but there are a lot of differences between Nebulon and Earth, and they make Zack miss his home in Dubbsville, Texas, even more. But things start to look up when he receives a mysterious surprise. What could it possibly be? With easy-to-read language and illustrations on almost every page, the Galaxy Zack chapter books are perfect for beginning readers.

## Customer Reviews

A cute little boy named Zack moves from Earth to a planet called Nebulon. Nothing is the same as

Zack's home planet. The sky, land, and water are different colors than on Earth, the cars fly, and the Nebulites speak very differently. Zack is nervous to move and he thinks no one will like him at school. He has to get used to everything on Nebulon. Hello Nebulon is an early chapter book with lots of awesome pictures (on every page) and words that are easy to read. Boys and girls will both like this book. Ages 6-8 would love to read it on their own but younger kids would love having it read to them because they'd like the story and pictures. My favorite parts are the cool gadgets like the little box that turns into a car when you push a button, Zack's bed that comes down from the ceiling at night, and the elevator in his house that goes in every direction. There's even an Indoor Robotic Assistant (IRA) that is wired throughout the house and does almost everything for Zack and his family. The whole book is my favorite part! The writing and story are both incredibly awesome. Zack is so lovable and that makes the book even more enjoyable. I give this book one hundred stars! I wish I could visit Nebulon. Review by Young Mensan Connor C., age 6, Boston Mensa

We won Hello Nebulon in a contest last summer. I had never heard of the book series before, but my "hates to read" 7 year old seemed interested in it right away. He started reading it and could NOT put it down. We'd tried everything for him- magic treehouse, A-z mysteries, etc- he just couldn't get into them. After he flew through this book, he went and purchased the second book in the series with his own money. He has since read every book in the series and cannot wait for the next one to come out. He's even loaned the books to his friends, who share his lack of excitement for reading and they also LOVED them. Awesome series!

I'm a university librarian and attend the American Library Association conference every year. This summer I picked up Hello, Nebulon for my 5 year old son. He loves it. He likes to pretend he's the main character and asks us to call him Zack. He pretends to speak to Ira, the in-home computer system. We're getting the entire set. Note, he can't read it to himself, we read it to him. Another way to keep him excited about books until he learns to read to himself.

There is an illustration nearly every turn of the page so this helps children transition from picture books to those with just text. My child found the story interesting and was keen to read the other books in the series.

This is the only book that my 8 year old, struggling reader LOVES to read. He literally grabbed the new books from my hands and ran off to read when he got home from school this afternoon. He

never chooses to read for fun, but with these books, he reads for a long time! Thank you, Ray O’Ryan for a great first chapter book series that appeals to young boys!

My seven year old and four year old both love Galaxy Zack. The stories are fun and engaging with great morals. Ray O’Ryan does a great job of making Nebulon an interesting place with its own culture and fun technology that young children will think is super grape! There are illustrations on every page and the vocabulary is simple enough for young readers, but don’t mistake this for a dumb kids story. The books are well-written and so fun to read. And best of all, they won’t make adults want to pluck their eyes out, as children’s chapter books often do. This book is a great start to a series that your children will definitely want to keep reading. I’d recommend buying the boxed set of the first four. You’ll save a bit of money, because I guarantee you will be buying the whole set of these books.

I was looking for a chapter book that would entertain my 4.5 year old (i.e. has lots of pictures/illustrations and engaging age-appropriate story) that was NOT Captain Underpants. Galaxy Zack fits that bill nicely. The illustrations (on almost every page) give her something to look at while going from chapter to chapter. The writing is a step above general picture books which challenges her to grow in her reading comprehension skills (even if I’m the one doing the reading.) The theme (of moving and making new friends) is easy to relate to for any kid. Overall this is a good book to fill the gap between Llama Llama and Ramona books.

Nebulon is a really fun world. My son thinks it’s really nice to have a robot to do all the chores for him. The book provide an exciting world for young kids who wish to have adventures in ordinary school life .
