## Book Information

Series: Studies in Geometry Series

Paperback: 64 pages

Publisher: Garlic Press (February 1, 2004)

Language: English

ISBN-10: 1930820461

ISBN-13: 978-1930820463

Product Dimensions: 8.5 x 0.5 x 11 inches

Shipping Weight: 12.6 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars [See all reviews](#) (4 customer reviews)

Best Sellers Rank: #156,645 in Books (See Top 100 in Books) #25 in [Books > Teens >](#)

[Education & Reference > Mathematics > Geometry](#) #41 in [Books > Children's Books > Education & Reference > Math > Geometry](#) #391 in [Books > Education & Teaching > Schools & Teaching > Instruction Methods > Mathematics](#)

Age Range: 12 and up

Grade Level: 7 and up

## Customer Reviews

This is a high school workbook. It has 36 pages of text, a 5-page glossary of proof reasons and justification (a useful summary), and 19 pages of answers to problems. Chapters include: Developing Lines of Reasoning, Work Backwards, Paragraph Proofs, Creating Order, and Formal [2-column] Proofs. Indirect proofs are not covered. This book might be helpful to the student needing help with standard geometric proofs, as it has much useful information in one small book.

Teaching students to write proofs is not an easy task. This book helps to progress them one small

step at a time through the process.

Nice introduction to math proofs for high school students.

AWESOME
